(Month) page number

A

acids
amino: levels in canned sweet potatoes and snap beans, (2)55
Glutamic Acid: Advances in Biochemistry and Physiology (book rev), (8)114
additives, food
FDA view of extraction testing methods for evaluating food packaging materials, (4)61
modeling the migration of indirect additives to food, (4)63
patents: (1)138; (2)108; (3)114; (4)114; (6)105; (7)117; (8)101; (9)105; (10)122; (11)107; (12)92
regulatory aspects of migration of indirect additives to food, (4)55
scientific aspects of migration of indirect additives from plastics to food, (4)56; (erratum) (6)27
See also **ingredients**
aflatoxins
Aflatoxins: Chemical and Biological Aspects (book rev), (3)104
longwave UV lamp to detect, (2)22
update on molds; degradation of, (1)81
agribusiness
critical trends affecting world food supply (OverView, 5 papers), (6)67
agricultural engineering
Dictionary of Agriculture and Food Engineering (book rev), (10)124
analyses
determining relationships among objective, expert, and consumer measures of texture, (10)84
Liquid Chromatographic Analysis of Food and Beverages, Vol. 1 & 2 (book rev), (12)98
portable instrument rapidly measures quality of frying fat in food service operations, (9)50
risk/benefit: developing public policy for food safety (OverView, 7 papers), (11)41
role of sensory evaluation in product quality assurance (OverView, 4 papers), (9)35
Standard Methods for the Examination of Dairy Products (book rev), (10)130
Appert, Nicholas award
See **IFT awards**
asbestos
health hazards associated with, in filtration, (4)67
method for isolating and identifying fibers in spiked beverages and foods, (11)69
assay
See **analyses; tests/testing**
associations
See **meetings and conferences; short courses and workshops; societies ad associations**
atherosclerosis
Drugs, Lipid Metabolism, and Atherosclerosis. Advances in Experimental Medicine and Biology, Vol. 109 (book rev), (11)119
awards
IFT wins technical communication awards, (2)12
See also **IFT awards**

B

bacteria
food spoilage by microorganisms tolerating low a_w environments, (1)72
lactic acid: microbes of diversity, (1)60
mesophilic aerobic sporeforming in spoilage of low-acid canned foods, (1)55
psychotrophic in foods: an update, (1)66
baked goods
patents: (1)126; (2)106; (3)112; (4)113; (5)220; (6)104; (7)116; (8)99; (9)101; (10)118; (11)105; (12)90
beans
green, raw and canned: nutrient content, (2)66
snap: amino acid levels in canned, (2)55; drained weight of canned, (10)54
beef
effect of HTC on muscle tissue, (4)41
See also **meat**
beer and brewing materials
patents: (1)128; (2)107; (3)113; (4)114; (5)225; (6)105; (7)117; (8)100; (9)105; (10)121; (11)107; (12)92
beverages
alcoholic: methods for isolating and identifying asbestos fibers in spiked, (11)69
alcoholic, patents: (1)128; (2)107; (3)113; (4)114; (5)225; (6)105; (8)101; (9)105; (10)121; (11)107; (12)92
Flavor of Foods and Beverages: Chemistry and Technology (book rev), (3)106
See also invidual beverages
BHA (butylated hydroxy anisole)
analysis in polyethylene by direct-sampling gas chromatography, (9)46
biology
Postharvest Biology and Biotechnology (book rev), (1)87
blanching
recycling of water in vegetables, (6)54
blood
animal: utilization in meat products, (8)76; erratum, (10)30
book reviews
(1)117; (2)99; (3)104; (4)98; (5)214; (6)99; (7)119; (8)114; (9)108; (10)124; (11)115; (12)94
index, (12)121
letter to editor, (3)22
brine
who invented the brine bath? the Isaac Solomon myth, (2)75
by-product technology
patents: (2)104; (3)115; (4)115; (5)238; (6)107; (7)118; (8)102; (9)107; (10)123; (11)107; (12)93

C

cake
See **baked goods**
cancer
food as factor in etiology of, (12)48
canned foods
low acid: mesophilic aerobic sporeforming bacteria in the spoilage of, (1)55
canning
effect on nutritive value of vegetables, (2)62
carbohydrates

nutrition and heart disease, (12)39
careinogens
predicament of food and nutrition, (10)42
cereal
chemical and physical properties of dietary fiber, (1)40
Global Malnutrition and Cereal Fortification (book rev), (12)94
products patents: (1)126; (2)106; (3)112; (4)113; (5)220; (6)104; (7)116; (8)99; (9)101; (10)118; (11)105; (12)90
Rye: Production, Chemistry and Technology (book rev), (6)100
science: *Advances in Cereal Science and Technology,* Vol. 1 & 2 (book rev), (8)116
cheese
analogs: utilization of peanut protein and oil in, (7)88
See also **dairy products**
chemistry
Agricultural and Food Chemistry: Past, Present, Future (book rev) (3)106
aspects of foods—FAQTS 5th congress report, (1)26
color of smoked foods, (5)54; erratum, (10)32
reactions of nitrite in meat, (7)46
viscoelastic properties of food as related to micro- and molecular structure, (10)71
chicken
See **meat; poultry**
chromatography
gas, direct-sampling: analysis of BHA in polyethylene, (9)46
Liquid Chromatographic Analysis of Food and Beverages, Vol. 1 & 2 (book rev), (12)98
citrus
use of enzymes in processing, (11)78
Clark, W.L.
becomes 40th President of IFT, (7)9
coatings
Modern Container Coatings (book rev), (2)100
cocoa
patents: (1)128; (2)107; (3)113; (4)114; (5)224; (6)105; (7)116; (8)100; (9)102; (10)120; (11)106; (12)91
coffee
patents: (1)128; (2)107; (3)113; (4)114; (5)224; (6)105; (7)116; (8)100; (9)102; (10)120; (11)106; (12)91
color
of smoked foods, (5)54; erratum, (10)32
patents: (1)128; (2)107; (3)113; (4)114; (5)225; (6)106; (7)117; (8)101; (9)105; (10)121; (11)107; (12)92
confectionery
patents: (1)127; (2)106; (3)113; (4)114; (5)222; (6)104; (7)116; (8)100; (9)102; (10)118; (11)106; (12)91
consultants/consulting
How to Become A Successful Consultant in Your Own Field (book rev), (2)100
Six Consulting Reports (book rev), (3)109
consumer and food service products
new: (1)104; (2)83; (3)82; (4)74; (5)194; (6)82; (7)98; (8)82; (9)76); (10)100; (12)77
consumerism
determining relationships among objective, expert, and consumer measures of texture, (10)84
recent developments in solving consumer-oriented texture problems, (10)61
rupture tests vs small-strain tests in predicting consumer response to texture, (10)67
cookbooks
Complete Gourmet Nutrition Cookbook (book rev), (4)98
Food For 50 (book rev), (11)126
The Culinary Olympics Cookbook (book rev), (8)114
cottonseed, glandless
tamacurd: high-protein ingredient, (7)82
curing
advances in technology of nitrite use and consideration of alternatives, (7)58
massaging and tumbling in the manufacture of meat products, (4)36
processing poultry products with and without sodium nitrite, (7)42
reactions of nitrite in meat, (7)46
smoke, See **smoking**

D

dairy
patents: (1)126; (2)105; (3)111; (4)113; (5)220; (6)103; (7)115; (8)99; (9)101; (10)118; (11)104; (12)90
Standard Methods for the Examination of Dairy Products (book rev), (10)130
deboning, mechanical
red meat, poultry, and fish, (3)77
diabetes
and diet, (12)60
diet
chemical and physical properties of dietary cereal fiber, (1)40
diabetes and, (12)60
dietary fiber, (1)35
introduction to Kosher dietary laws for food scientists and processors, (1)89; (4)28
major factor in high blood pressure, (12)57
See also **nutrition; health**
diet foods
patents: (2)108; (4)114; (6)106; (8)101; (9)106; (10)122; (11)108; (12)92
diethylstilbestrol
predicament of food and nutrition, (10)42
disease, chronic
role of nutrition in (OverView, 5 papers), (12)57
See also **diet; health; nutrition**
drugs
Drugs, Lipid Metabolism, and Atherosclerosis. Advances in Experimental Medicine and Biology, Vol. 109 (book rev), (11)119
drying
Proceedings of the First International Symposium on Drying (book rev), (3)107

E

economics
critical agribusiness trends affecting world food supply (Overview, 5 papers), (6)67
social and economic factors in food safety decision making, (11)47
education
a career in industry—which degree is best, (12)26
changes in industrial research require changes in graduate education, (12)30
graduate education for food scientists—what are the choices? (12)28
news notes: (1)18; (2)18; (3)16; (4)20; (5)34; (6)15; (7)22; (8)18; (9)32; (10)28; (11)20; (12)21
nutrition: new and diversified opportunity for food scientists, (12)32
symposium: graduate education for food scientists, (12)26, 28, 30, 32
undergraduate programs for advanced degrees in food science, (12)26, 28
See also **IFT; meetings and conferences; short courses and workshops; symposia**
egg products
patents: (1)127; (2)105; (3)111; (4)113; (5)219; (6)103; (7)115; (8)99; (9)100; (10)118; (11)104; (12)90
electrokinetics
in filtration, (4)67
Enterobacteriaceae
in foods, (7)31
environment
assessing the impact of residues and toxic substances, symposium (5 papers), (6)32
Toxicity of Heavy Metals in the Environment, Part 2 (book rev), (6)99

enzymes
Industrielle Enzyme (book rev), (8)116
in food processing—FAQTS 5th congress report, (1)29
use in citrus processing, (11)78
equipment and processes
patents: (1)138; (2)107; (3)115; (4)115; (5)238; (6)108; (7)118; (8)101; (9)106; (10)122; (11)108; (12)93
erratum
(5)42; (6)27; (10)30, 32
extrusion
in manufacture of poultry products, (4)48

F

FAQTS
food availabity and quality through technology and science, 5th congress report, (1)22
fats
FAQTS 5th congress report, (1)121
frying, in food service operations: portable instrument rapidly measures quality of, (9)50
future impact of economics and political trends, (6)74
FDA
See **government**
feeds
patents: (2)104; (3)115; (4)115; (5)238; (6)107; (7)118; (8)102; (9)107; (10)123; (11)107; (12)93
fiber(s)
asbestos: method for isolating and identifying in spiked beverages and foods, (11)69
diabetes and diet, (12)60
dietary: chemical and physical properties of cereal, (1)40
dietary, (1)35
Diebary Fibre: Current Developments of Importance to Health (book rev), (12)97
nutrition and heart disease, (12)39
filtration
old process with a new look, (4)67
fish
intermediate-moisture: improving the acceptability, (10)52
mechanically deboned, (3)77
patents: (1)126; (2)105; (3)111; (4)113; (5)219; (6)103; (7)115; (8)99; (9)100; (10)118; (11)104; (12)90
flavor
Flavor: Its Chemical, Behavioral, and Commercial Aspects (book rev), (6)100
Flavor of Foods and Beverages: Chemistry and Technology (book rev), (3)106
food texture in the mouth, (10)89
improving acceptability of intermediate fish, (10)52
liquid smoke flavoring—status of development, (5)88
patents: (1)128; (2)107; (3)113; (4)114; (5)225; (6)106; (7)117; (8)101; (9)105; (10)121; (11)107; (12)92
Symposium. Flavours of Fruits and Fruit Juices (book rev), (12)95
The Fragrance and Flavor Industry (book rev), (1)118
flavoring
GRAS substances, 12, recent progress under FDA, (7)65
food acceptability
magnitude estimation can predict whether a menu item is potentially boring, (8)72
food engineering
an energy-efficient system for treating food wastes, (6)44
Dictionary of Agricultural and Food Engineering (book rev), (10)124
Food Engineering (book rev), (11)120
hypobaric transport and storage of fresh meats and produce earns 1979 IFT food technology industrial achievement award, (7)32
improving acceptability of intermediate moisture fish, (10)52
quality of mechanically harvested strawberries for processing, (5)92
recent trends in food texture measurement (OverView, 6 papers), (10)59
recycling of water in vegetable blanching, (6)54
food history
who invented the brine bath? The Isaac Solomon myth, (2)75
food industry
a career in industry—which degree is best, (12)26
Almanac of the Canning, Freezing, Preserving Industries (book rev), (9)108
an energy-efficient system for treating food wastes, (6)44
changes in industrial research require changes in graduate education, (12)30
economical evaluation of soy isolate production by a membrane isolation process, (5)46
Guide for Waste Management in the Food Processing Industry (book rev), (10)128
Guide to Literature on Waste Management in the Food Processing Industry 1900-1975 (book rev), (10)128
metal residues in foods, (6)42
news: (1)113; (2)91; (4)92; (9)92
pretreatment of proteinaceous food processing wastewaters with lignin sulfonates, (6)50
Process Plant & Equipment Cost Estimation (book rev), (10)124
Progress in Industrial Microbiology, Vol. 15 (book rev), (11)121
recycling of potentially toxic residues in the food chain, (6)32
recycling of water in vegetable blanching, (6)54
regulatory control of environmental hazards, (6)39
solving pollution problems can cause new problems, (6)37
the scientist and the marketplace, (8)56
toxicological assessment of food residues, (6)35
food poisoning
See **toxicology**
food processing
application of sensory evaluation to the routine maintenance of product quality, (9)38
a quality assurance perspective of sensory evaluation, (9)37
Effects of Heating on Foodstuffs (book rev), (9)110
enzymes in—FAQTS 5th congress report, (1)29
loss of nutrients during—FAQTS 5th congress report, (1)138
Small Scale Processing and Storage of Tropical Root Crops (book rev), (12)96
Solids Separation and Mixing. Process Equipment Series, Vol. 1 (book rev), (12)99
sugars and nutritive sweeteners in processed foods, (5)101
use of reference standards for sensory evaluation of product quality, (9)43
utilizing sensory evaluation to determine product shelf life, (9)40
food production
future impact of economic and political trends on vegetable proteins, (6)72

IFT Basic Symposium . . .

Postharvest Biology and Biotechnology

. . . Second in the Series

Edited by:
Herbert O. Hultin, Ph.D., University of Massachusetts, Department of Food Science and Nutrition, Amherst

and

Max Milner, Ph.D., Massachusetts Institute of Technology, Department of Nutrition and Food Science, Cambridge

Price: $45;
462 pages; hardcover

This book is the second in the series of basic symposia on a topic of major importance to food scientists and food technologists sponsored by the Institute of Food Technologists and the International Union of Food Science and Technology. The Symposium on Postharvest Biology and Biotechnology was held in June 1977 at the Annual IFT Meeting and covered subjects extremely complex from a scientific point of view and yet critical to solutions of global food problems.

The main focus was on the relationship between the basic biological, chemical, and physical phenomena of postharvest plant tissues and maintenance of nutritional, esthetic, and keeping qualities of the products. There are four main areas covered which include: (1) Biochemical Changes in Edible Plant Tissue During Maturation and Storage; (2) Response of Edible Plant Tissues to Stress Conditions; (3) Native Structure of Edible Plant Tissues and Effects of Disruption, and (4) Quality Attributes of Edible Plant Tissues. Within each of these main sections there are four chapters prepared by leading workers in the respective subject areas. Thus not only are fruits and vegetables discussed but also edible plants including cereals, legumes, and oilseeds. It is noteworthy that the majority of the calories, proteins, vitamins, and minerals for most of the people of the world are derived from these types of products.

This book will be of value to those in postharvest research, food scientists and technologists in the food industry, agriculturists, students, and those in related fields including biochemists, plant physiologists, and phytopathologists.

Contents—Section 1: Biochemical Changes in Edible Plant Tissue During Maturation and Storage. Chapter 1, Biochemical and Functional Changes in Cereals: Maturation, Storage, and Germination—W. Bushuk and J. W. Lee; 2, Biochemical Changes in Soybeans: Maturation, Storage, and Germination—J. J. Rackis; 3, Role of Hormones in Ripening and Senescence—W. B. McGlasson; 4, Biochemical and Physiological Effects of Modified Atmospheres and Their Role in Quality Maintenance—W. G. Burton.

Section 2: Response of Edible Plant Tissues to Stress Conditions. Chapter 5, Stress Metabolites in Postharvest Fruits and Vegetables—Role of Ethylene—N. F. Haard; 6, Temperature Stress in Edible Plant Tissues After Harvest—I. Uritani; 7, Pathological Diseases of Fresh Fruits and Vegetables—J. W. Eckert; 8, Fungal Deterioration and Related Phenomena in Cereals, Legumes, and Oilseeds—R. J. Bothast.

Section 3: Native Structure of Edible Plant Tissues and Effects of Disruption. 9, Fine Structure of Cereal Grains as Related to End-Use Properties—Y. Pomeranz; 10, Contribution of Individual Chemical Constituents to the Functional (Bread-Making) Properties of Wheat—K. K. Finney; 11, Relationship Between Fine Structure and Composition and the Development of New Food Products from Legumes—L. B. Rockland; 12, Enzyme action and Modifications of Cellular Integrity in Fruits and Vegetables: Consequences for Food Quality During Ripening, Senescence, and Processing—S. Schwimmer.

Section 4: Quality Attributes of Edible Plant Tissues. 13, Toxins in Legumes: Their Possible Nutritional Significance in the Diet of Man—I. E. Liener; 14, Enzymes As Quality Indicators in Edible Plant Tissue—J. P. Cherry; 15, Biogenesis of Flavor Components—R. J. Croteau; 16, Role of Hydroperoxides in the Onset of Senescence Processes in Plant Tissue—C. Frenkel.
